

Municipal administration

I would like to welcome you to the municipal administration of Allschwil and I am glad to inform you about our community and its facilities.

The municipal administration is the central point for all administrative questions concerning the municipality. Our "AllService" department provides information on how to register or who to contact in case of more specific questions. If you have any problems or needed assistance, there are free advisory services particularly for social issues and legal cases.

For detailed information about the municipal information particularly the departments and their responsibilities please visit the German website. (Reference VERWALTUNG)

Kind regards,
Patrick Dill, Gemeindeverwalter
